POLYPROPYLENE WELL SCREEN PIPING

Now Available for All Your Well Screen & Remediation Needs.

POLYPROPYLENE WELL SCREEN CASINGS

Lighter than steel, with very strong joints.
(Pull apart test to 17,000 lbs.) Schedule 40 or schedule 80 with standard flush joint thread!
Extensive cost savings over stainless!

Introducing
New Polypropylene well screen casing!
Ideal for use in solvent based remediation where PVC casing fail or stainless steel is prohibited because of cost and chemical attack.
NO stress cracking of stainless steel due to welding.

OPTIONS

- Polypropylene MACHINED SLIP JOINTS are precision machined permitting positive locking joints.
- Machine Slip Joint Screens and Casings prevent bridging of sand packs, clay seals, gravel packing and grouting.
